

# DISADVANTAGES:

- *All disadvantages are a result of poor application blast/flash methods, carelessness, and misinformation.*
- Dangerous acid
- Unreliable treatment
- Corrosive liquid
- *Overdose and 85% acid symptoms:*
  - Queen and colony losses
  - Queen stops laying
  - Drone sterility
  - Brood mortality and removal
- *All of these problems can be avoided through education, following safety rules, using proper equipment and a low-dose continuous release method with 65% formic acid.*
